

# SYNCHRONYMD

Helping communities live healthier, happier, longer lives.

SynchronyMD provides advanced information technology solutions, improving access to high-quality healthcare in rural or understaffed facilities.

## WHAT WE PROVIDE

Sustainable, affordable telemedicine, including:

- Remote general and specialized physician access
- User-friendly, custom-tailored technology
- Monthly performance management
- Onsite staff training
- Standby technical support

## YOUR TEAM

Hospitals partnered with SynchronyMD receive remote, on-call access to a variety of skilled physicians across the nation.

### HOSPITALISTS

SynchronyMD's hospitalists provide virtual services to inpatient care facilities or EDs.

### SPECIALISTS

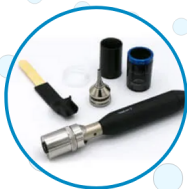

SynchronyMD's specialists provide virtual specialty care in clinics, inpatient care facilities, or EDs.

## YOUR TECH

SynchronyMD's provided telemedicine station and equipment carry a flexible modular design to accommodate a wide range of examination needs. Our partners will receive the following:

### TOTAL REMOTE EXAM KIT

Comes with a high-definition camera with multiple functionality.

### TOTAL VITALS MONITOR

Complete assessments conducted with secure remote monitoring

### TOTAL ECG DEVICE

Bluetooth 12-lead ECG with analysis.

### CLEAR STETHOSCOPE

Detects real-time heart sounds and rhythm.

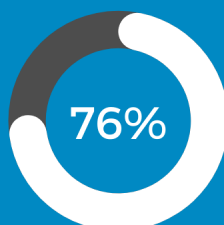

### CAS LITE TELE CART

Telemedicine stations like our telecart provide a hub for secure, integrated virtual care encounters that can be performed wherever patients are located.

## WHY TELEMEDICINE?

### LESS READMISSION

Studies show that patient readmission rates **decrease** with enrollment in telemedicine.

### PATIENT VALUES

76% of patients value access to healthcare over in-person visits.

### WIDER ACCESS

Telemedicine increases access to healthcare in rural communities.

### COST EFFECTIVE

SynchronyMD's hospitalists and specialists cost less per shift than in-person physicians.
